

10/14

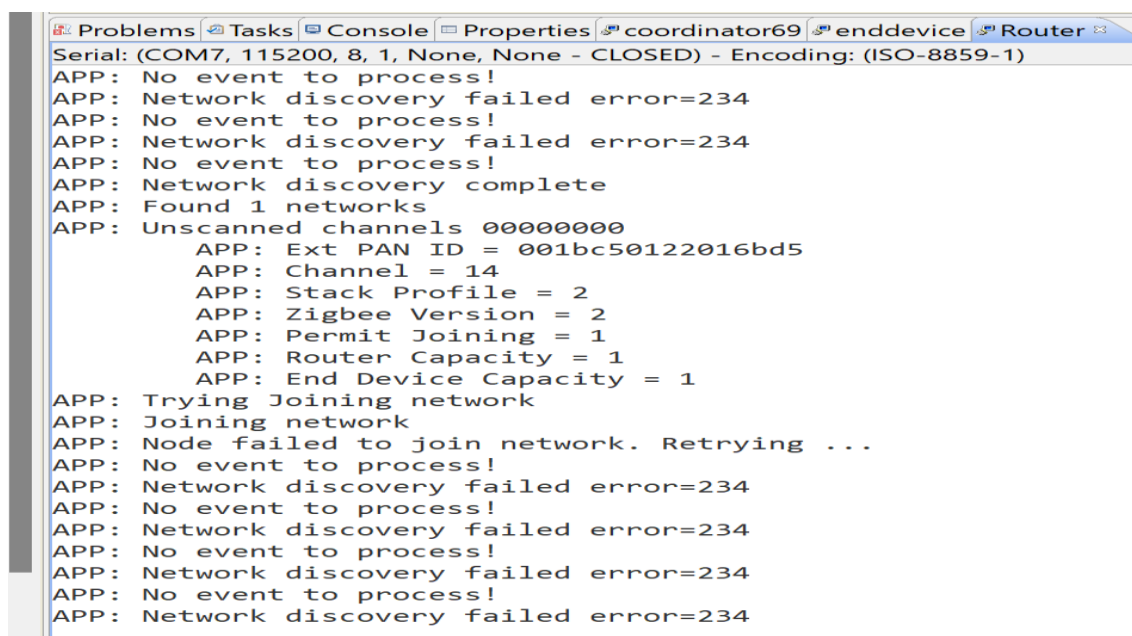

前回は coordinator と enddevice だけの通信だったが, 今回は router も追加する.

手順として, coordinator と router, その後 enddevice を接続する.

○Coordinator 実行後の terminal 内容

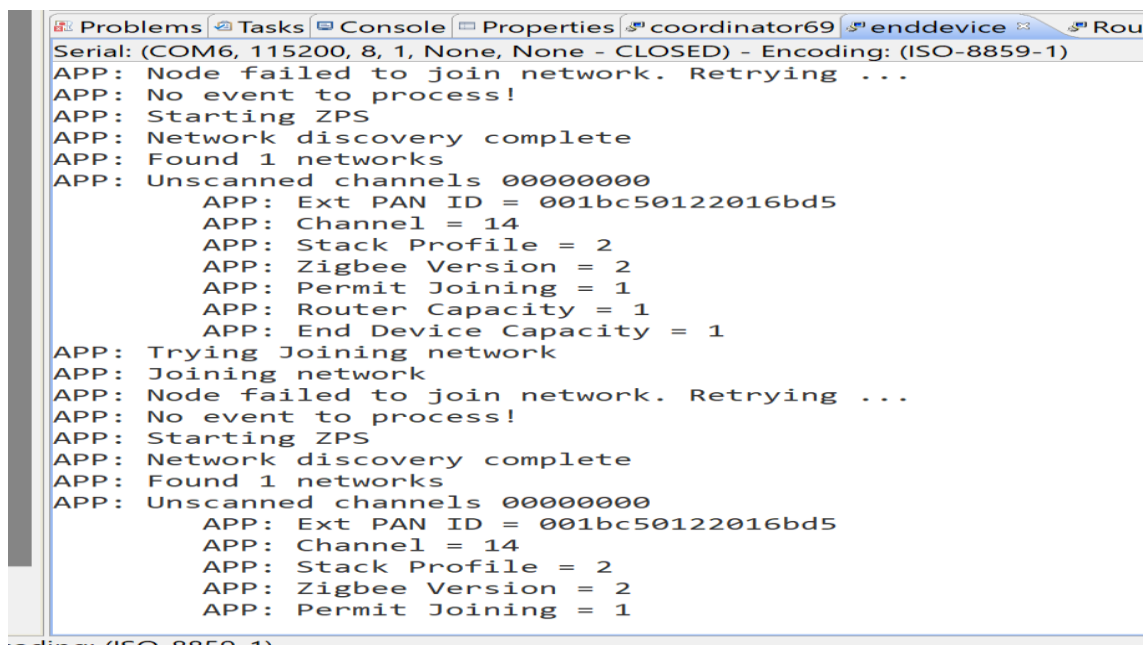

APP: No event to process (待機中であるというメッセージ)

○Router 実行後の terminal 内容

```
Serial: (COM7, 115200, 8, 1, None, None - CLOSED) - Encoding: (ISO-8859-1)
APP: No event to process!
APP: Network discovery failed error=234
APP: No event to process!
APP: Network discovery failed error=234
APP: No event to process!
APP: Network discovery complete
APP: Found 1 networks
APP: Unscanned channels 00000000
      APP: Ext PAN ID = 001bc50122016bd5
      APP: Channel = 14
      APP: Stack Profile = 2
      APP: Zigbee Version = 2
      APP: Permit Joining = 1
      APP: Router Capacity = 1
      APP: End Device Capacity = 1
APP: Trying Joining network
APP: Joining network
APP: Node failed to join network. Retrying ...
APP: No event to process!
APP: Network discovery failed error=234
APP: No event to process!
APP: Network discovery failed error=234
APP: No event to process!
APP: Network discovery failed error=234
APP: No event to process!
APP: Network discovery failed error=234
```

○enddevice 実行後の terminal 内容

```
Serial: (COM6, 115200, 8, 1, None, None - CLOSED) - Encoding: (ISO-8859-1)
APP: No event to process!
APP: Starting ZPS
APP: Network discovery complete
APP: Found 1 networks
APP: Unscanned channels 00000000
      APP: Ext PAN ID = 001bc50122016bd5
      APP: Channel = 14
      APP: Stack Profile = 2
      APP: Zigbee Version = 2
      APP: Permit Joining = 1
      APP: Router Capacity = 1
      APP: End Device Capacity = 1
APP: Trying Joining network
APP: Joining network
APP: Node failed to join network. Retrying ...
APP: No event to process!
APP: Starting ZPS
APP: Network discovery complete
APP: Found 1 networks
APP: Unscanned channels 00000000
      APP: Ext PAN ID = 001bc50122016bd5
      APP: Channel = 14
      APP: Stack Profile = 2
      APP: Zigbee Version = 2
      APP: Permit Joining = 1
```

2 回目の接続では

○Coordinator

```
Problems Tasks Console Properties enddevice Router coordinator69
Serial: (COM5, 115200, 8, 1, None, None - CONNECTED) - Encoding: (ISO-8859-1)
APP: No event to process
APP: No event to process
APP: vCheckStackEvent: vCheckStackEvent: ZPS_EVENT_NEW_NODE_HAS_JOINED, Nwk Addr=0xb722
APP: No event to process
APP: No event to process
APP: No event to process
APP: No event to process
APP: No event to process
APP: No event to process
APP: vCheckStackEvent: vCheckStackEvent: ZPS_EVENT_NEW_NODE_HAS_JOINED, Nwk Addr=0xb722
APP: No event to process
APP: No event to process
APP: No event to process
APP: No event to process
```

○Router

上記と同じ

○Enddevice

```
Problems Tasks Console Properties enddevice Router
Serial: (COM6, 115200, 8, 1, None, None - CONNECTED) - Encoding: (ISO-8859-1)
APP: Unexpected event in E_NETWORK_JOIN - 15
APP: Node failed to join network. Retrying ...
APP: No event to process!
APP: Starting ZPS
APP: Network discovery complete
APP: Found 1 networks
APP: Unscanned channels 00000000
    APP: Ext PAN ID = 001bc50122016bd5
    APP: Channel = 12
    APP: Stack Profile = 2
    APP: Zigbee Version = 2
    APP: Permit Joining = 1
    APP: Router Capacity = 1
    APP: End Device Capacity = 1
APP: Trying Joining network
APP: Joining network
APP: Unexpected event in E_NETWORK_JOIN - 15
```

各コードにある vStartup 関数は接続時に起動するので、表示されない。

○エラー15

アプリケーションにはキーがないので、HA と LL のどちらかを定義する必要がある。

HA を定義するために、追加しなければならないが、リンクで指示されたコードが見当たらない。

BeyondStudio for NXP にインポートしている JN-AN-1184 にあるプログラム内に無い。

○Coordinator, router , enddevice の接続できる数 (Capacity) が 1 であることと, Channel が原因かも。
